

## **“Arts for Day Surgery” Charity Auction for the Day Surgery Foundation**

Milan, 16 November 2006

Big confluence of people, lots of paintings and jewelry auctioned. Great hospitality, unique and great sympathy of Dr. Casimiro Porro and all his collaborators.

These were the keys to the success of the event that took place on Tuesday night at la Casa d’Aste Porro & Co., in favour of the Day Surgery Foundation.

Another little step to achieve what professor Campanelli is working on. The realization of a self-sufficient structure completely equipped to perform surgeries under the Day Surgery system.

Structure that needs to be included in a public hospital in Lombardia. A system that would decrease the waiting lists for all those surgeries that don’t require a long hospitalization.

A project that will be possible thanks to an act of generosity from all the people who have contributed to the realization of this event.

Thanks to the generosity of great painters who donated their works. Thanks to the people who donated their personal paintings and jewelry.

A special thanks to la Casa d’Aste Porro, to Dr. Casimiro Porro and Mrs. Kimiko Bossi, who were able to give value to the charity event inside their art gallery.

Thanks to all the people that with their spontaneous generosity have purchased the art works.
